DETAILED ACTION

Faxing of Responses to Office Actions

In order to reduce pendency and avoid potential delays, TC 3700 is encouraging FAXING of responses to Office Actions directly into the Group at (703)305-3579. This practice may be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into TC 3700 will be promptly forwarded to the examiner.

Election/Restriction

1. Applicant's election of Group I, Claims 1-16 in Paper No. 4 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Art Unit: 3722

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference characters "30" and "390" have both been used to designate a "backing sheet" as stated on page 13, lines 16-22. Correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claims 4-6 recites the limitation "the envelope" in line 1. There is insufficient antecedent basis for this limitation in the claim. The examiner interprets "envelope" to be the "compartment".

Art Unit: 3722

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-11 and 13-16, as best understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Coats et al (5,624,069).

Coats et al discloses in Fig. 1-5 and 8, a mailing assembly comprising a backing sheet (11) having an adhesive layer (36) between the backing sheet and a mailing form and is capable of forming a compartment (A and B), a mailing form (37) removably attached to the backing sheet (11) and printed with indicia, wherein the mailing form is capable of fitting within the compartment; and an auxiliary label or sub-parts separated by a tear line (C) and attached to the backing sheet (seen in Fig. 2). The backing sheet is also capable of adhering to a mailpiece (35).

However, Coats et al does not disclose a mailing assembly comprising information complying with the requirements for delivery of the mailpiece; and an envelope (compartment) that is transparent.

In regards to **Claims 1, 9 and 13**, it would have been obvious to one having ordinary skill in the art at the time the invention was made to place any desired indicia on the backing sheet and

Art Unit: 3722

the mailing form, since it would only depend on the intended use of the assembly and the desired information to be displayed. Further, it has been held that when the claimed printed matter is not functionally related to the substrate it will not distinguish the invention from the prior art in terms of patentability. *In re Gulack* 217 USPQ 401, (CAFC 1983). Also, in the present case, there appears to be no new or unobvious structural relationship between the printed matter and the substrate.

In regards to **Claims 6 and 16**, it would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate a compartment made of transparent material, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Allowable Subject Matter

5. Claim 12 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3722

Prior Art References

The prior art references listed in the attached PTO-892, but not used in a rejection of the claims, are cited for (their/its) structure. Bendel, Jenkins et al, Shoenfeld, Lombardo, Petkovsek ('647), Petkovsek ('370), Petkovsek ('286), Petkovsek ('844), Petkovsek ('802), Angus, Petkovsek ('999), Petkovsek ('123) and Coffey et al disclose business mailers with envelopes.

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark T. Henderson whose telephone number is (703)305-0189. The examiner can be reached on Monday - Friday from 7:30 AM to 3:45 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner supervisor, A. L. Wellington, can be reached on (703) 308-2159. The fax number for TC 3700 is (703)305-3579. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the TC 3700 receptionist whose telephone number is (703)308-1148.
